ABSTRACT

Part of a series on student flow in the seven Hawaii community colleges, this report analyzes fall 1975 entering students in their fifth semester. Of a total of 8,979 entering students in fall 1975, 2,342 were registered in fall 1977, and 1,844 had been continuously enrolled over the five semesters. The continuation rate from the previous semester was 67%, and rates were lower at every campus compared to the previous semester. Overall, continuation rates were higher for males, students over 29 at the time of entry, married students, graduates of island public high schools, new students as compared to transfer students, full-time students, those seeking an Associate of Science degree, those in business programs, those having between a 2.0-2.9 grade point average, and those with a credit-completion ratio of .70-.79 or .90-.99. There were fewer statistically significant differences between continuing and non-continuing students in the third, fourth and fifth semesters than in the second semester of enrollment. For the community college total and for each of the seven community colleges in the system, there was a statiscally significant difference in continuation rates for the credit-completion ratio characteristic. Extensive tables supplement the text. (LH)

## A. Introduction

### 1. Nature of This Report

This report is an analysis of the characteristics of students (Fall 1975 Entering Students, only) who were enrolled in our colleges in Fall 1977 for *their fifth consecutive semester*. These continuing students are compared to those who are not currently enrolled. (Student Flow Reports 10, 16, and 23 analyzed the characteristics of those continuing and not continuing during the Spring 1976, Fall 1976 and Spring 1977 semesters.) Our results are based on the data in the University of Hawaii's student files.

This comparison of continuing and non-continuing students includes analysis in terms of the following ten characteristics:

--personal: sex, age at time of entry, marital status

--academic: high school background, Fall 1975 entry status and Spring 1977 characteristics: full-/part-time status, educational objective, program, grade point average and credit-completion ratio.

Findings on continuation rates are summarized in two sections: (a) for the community college total and (b) for each campus, by program.

### 2. Definitions: Registrants, Continuers, Stop-outs

The term registrants as used in this Student Flow Project is a general one, applicable to all Fall 1975 entering students enrolled in the current semester. There are two kinds of registrants: "continuers" and "stop-outs". The terms are further defined below.

The term registrants is defined as those students (Fall 1975 entering, only, for this report) who are registered in the current semester. Registration rate is derived by dividing the number of registered students by the number of potential registrants (total entering students minus non-returning graduates).

The term continuers is defined in this report as those students (Fall 1975 entering, only, for this report) who have attended all semesters since Fall 1975 without interruption. The continuation rate is calculated by dividing the number of students enrolled continuously since entry by the potential continuing students (total continuers at the end of the previous semester minus number graduating at the end of the semester).

The term stop-outs is defined as those students (Fall 1975 entering, only, for this report) who are registered in the current semester but who had stayed out a semester or two. The number is obtained by subtracting the total number of continuers from the total number of those registered.

Table 1, which presents data in terms of the definitions above, shows that both the registration rate and the continuation rate declined this semester. The number of stop-outs this Fall (478) more than doubled compared to last Fall (151).

TABLE 1
REGISTRATIONS, CONTINUATIONS AND STOP-OUTS
FALL 1977

FALL 1977:

| Registrants and Registration Rate | | Continuers and Continuation Rate | | Stop-Outs | |
|---|---|---|---|---|---|
| Total Entering Fall '75 | 8,979 | Total Entering Fall '75 | 8,979 | Registration | 2,342 |
| Non-Returning Grads | - 556 | Continuously Registered Students, End of Sp. '77 | 2,747 | Continuation | -1,844 |
| Potential Registrants | 8,423 | No. of Continuously Registered Students Enrolled in Fall '77 | 1,844 | Stop-outs | 478 |
| Number Registered | 2,342 | | | | |
| Registration Rate 2,342 ÷ 8,423 | 28% | Continuation Rate 1,844 ÷ 2,747 | 67% | | |

Continuation Rate, 2542P4, October 19, 1977

## B. Findings: Community College Total

A detailed table showing continuation rates in Fall 1977 for the community college total and by campus is found in Appendix A. The highlights of that table are discussed in this section of our report.

### 1. Continuation Rates

As indicated earlier, the continuation rate in Fall 1977 for the community colleges as a whole was 67 percent. Campuses differed in their continuation rates in Spring 1976, Fall 1976, Spring 1977 and Fall 1977 as shown below:

| | Spring 1976 | Fall 1976 | Spring 1977 | Fall 1977 |
|---|---|---|---|---|
| Community College Total | 72% | 64% | 80% | 67% |
| Hawaii Community College | 77% | 65% | 86% | 70% |
| Honolulu Community College | 73% | 70% | 81% | 66% |
| Kapiolani Community College | 74% | 64% | 77% | 68% |
| Kauai Community College | 64% | 65% | 81% | 67% |
| Leeward Community College | 75% | 64% | 80% | 69% |
| Maui Community College | 66% | 61% | 78% | 57% |
| Windward Community College | 67% | 50% | 73% | 65% |

Continuation rates were lower at every campus this Fall compared to the previous semester. The rates ranged from 70 percent at Hawaii to 57 percent at Maui. (The range in Spring 1977 was 86 percent, Hawaii, to 73 percent, Windward.)

*Our analysis of the community college total also showed that there were statistically significant differences in continuation rates based on all characteristics except sex, marital and entry status. Campuses differed, however, on the characteristics which revealed statistically significant differences in continuation rates.* (See Table 2.) *"Significant" items were credit-completion ratio for all seven campuses and grade point average for six campuses.* Students at Honolulu differed significantly in their continuation rates based on nine characteristics; Hawaii, on seven; Kapiolani, on six; Leeward, on five; Windward, Maui and Kauai, on three, two, and one, respectively.

TABLE 2
STUDENT CHARACTERISTICS AND CONTINUATION/NON-CONTINUATION RATES
FALL 1977

Note: Level of statistical significance is denoted thus: *.05 level, **.01 level, ***.001 level

| Characteristics | Total | Hawaii | Honolulu | Kapiolani | Kauai | Leeward | Maui | Windward |
|---|---|---|---|---|---|---|---|---|
| Sex | | | ** | | | | | * |
| Age | * | | * | * | | | | |
| Marital Status | | | * | | | * | | |
| High School Background | ** | *** | ** | | | | | |
| Entry | | * | | | | | | |
| Full-/Part-Time | *** | ** | ** | * | | | | |

2. Personal Characteristics

a. Sex: *For the community college total, the continuation rate for males was higher than for females (69 percent compared to 65 percent). Students on two campuses (Honolulu and Windward) differed significantly in their continuation rates by sex.* The continuation rates for females ranged from 72 percent at Kauai to 54 percent at Windward; for males from 73 percent at Hawaii and Windward to 58 percent at Maui.

b. Age: *There were statistically significant differences in continuation rates, by age groups, for the community college total, Honolulu and Kapiolani. For the community college total, the highest continuation rate was for the group over 29 years of age at entry (70 percent), and the lowest rate (60 percent) was for students 22-24 years of age.* The continuation rates for the over 29 age group ranged from 81 percent at Windward to 54 percent at Honolulu; for the 22-24 age group from 75 percent at Kauai to 29 percent at Windward.

c. Marital Status: *Students differed significantly by marital status at Honolulu and Leeward.* The continuation rate for married students was 68 percent for the total and ranged from 75 percent, Leeward, to 57 percent, Honolulu; the rate for single students was 67 percent for the total and ranged from 73 percent, Hawaii, to 54 percent, Maui.

3. Academic Characteristics

a. High School Background: *There were statistically significant differences in continuation rates, by high school background, for the total, Hawaii and Honolulu. For the community college total, the highest continuation rates were for the groups who graduated from public high schools (69 percent). Students who entered the community colleges without high school diplomas and those who graduated from foreign high schools had the lowest rates (55 and 58 percent).* Campuses differed in the high school group having the highest continuation rate. For example, the highest and lowest continuation rates at each campus were:

| | Highest | Lowest |
|---|---|---|
| Hawaii CC | 88% Public, Oahu | 18% Foreign |
| Honolulu CC | 70% Public, N.I. | 33% Other |
| Kapiolani CC | 71% Public, Oahu | 52% Foreign |
| Kauai CC | 100% Foreign | 40% Other |
| Leeward CC | 79% Public, N.I. | 66% U.S. Main. & Poss. |
| Maui CC | 71% Public, Oahu | 40% Other |
| Windward CC | 77% Private, HI State | 58% Other |

b. Entry Status: *Students did not differ significantly, by entry status, except at Hawaii.* For the total, Hawaii, Kapiolani and Maui, new students had higher continuation rates than transfer students. The continuation rate was 68 percent, ranging from 75 percent at Hawaii to 58 percent at Maui. The rate for transfer students was 65 percent, ranging from 70 percent at Kauai and Leeward to 48 percent at Hawaii.

c. Full-/Part-Time Status in Spring 1977: *There were statistically significant differences in continuation rates, by full-/part-time status, for the total, Hawaii, Honolulu and Kapiolani. For the total and five campuses, full-time students had higher continuation rates than part-time students.* The rate for full-time students was 70 percent for the total and ranged from 78 percent at Hawaii to 61 percent at Maui; for part-time students the rate was 62 percent and ranged from 68 percent at Kauai to 48 percent at Maui.

d. Educational Objective: *There were statistically significant differences in continuation rates, by educational objective, for the total, Hawaii, Honolulu, Kapiolani and Leeward. Generally, the highest continuation rates were for students seeking A.S. degrees.* This was true for the total (76 percent), Hawaii (78 percent), Honolulu (75 percent), Kapiolani (82 percent), Leeward (72 percent), and Maui (63 percent). Continuation rates were highest for the 9 unclassified students (90 percent), followed by A.A. candidates (63 percent) at Windward; also for unclassified students (83 percent) at Kauai.

e. Program: *There were statistically significant differences in continuation rates, by program, for the total, Hawaii, Honolulu, Kapiolani and Leeward Community Colleges. Business students had the highest continuation rate (77 percent) for the total, followed by technology (76 percent) and hotel/food services (72 percent).* Programs (enrolling at least 26 continuing students) with the highest continuation rates on each campus were not identical, but technology and business predominated:

| | |
|---|---|
| --Hawaii CC | 93% Technology |
| --Honolulu CC | 76% Technology |
| --Kapiolani CC | 80% Business |
| --Kauai CC | No program enrolled 26 students |
| --Leeward CC | 76% Business and Technology |
| --Maui CC | 63% Business |
| --Windward CC | 63% Liberal Arts |

If one looks at the number of continuing students, the following programs have the largest enrollments: liberal arts (831) for the total, Leeward (452), Maui (46) and Windward (67); business for Hawaii (38), and Kapiolani (249). In addition to liberal arts, other programs with large numbers of continuing students for the total were business (452) and technology (317).

Among the non-continuing students are 555 who graduated in Spring 1977:[1]

91 liberal arts
134 business
74 health services
17 hotel/food services
29 public services
206 technology
3 unclassified
1 no data

f. Grade Point Average: *There were statistically significant differences in continuation rates, by grade point average, for the total and six campuses. Those with grade point averages of 2.0-2.9 had the highest continuation rates, 75 percent, followed by the group with 3.5 and above (71 percent), 3.0-3.4 (69 percent) and below 2.0 (49 percent).* On all seven campuses, the students with below 2.0 grade point averages had the lowest continuation rates, ranging from 54 percent at Honolulu to 27 percent at Maui. The group having grade point averages of 2.0-2.9 had the highest rates on five campuses (Hawaii, Honolulu, Kapiolani, Kauai and Leeward).

g. Credit-Completion Ratio: *There were statistically significant differences in continuation rates, by credit-completion ratio, for the total and all seven community colleges. For the total, the highest continuation rates were for students with CCRs of .90-.99 and .70-.79 (74 percent). The group with CCRs under .50 had a continuation rate of 46 percent.* On most campuses, students with CCRs above .60 had the highest continuation rates, and on all campuses the group with below .50 CCRs had the lowest continuation rates, ranging from 52 percent at Leeward to 28 percent at Maui.

## C. Findings: Campus Highlights, by Program

### 1. Hawaii Community College (112 continuing students; 70% continuation rate)

Data in Table B-1 cover six programs and unclassified students. The range in continuation rates was 100 percent for health services to 33 percent for unclassified students. Since four of the programs (health services, hotel/food services, public services and unclassified students) had fewer than 26 continuing students, discussion in this section will deal only with students in the liberal arts (32 continuing students), business (38) and technology (28).

*There were statistically significant differences in continuation rates, by the following characteristics and for the following programs:*

[1] Computer Report, 2542 F, for Fall 1977.

| | |
|---|---|
| *--sex* | *technology* |
| *--high school background* | *business* |
| *--educational objective* | *technology* |
| *--grade point average* | *business, technology* |
| *--credit-completion ratio* | *business, technology* |

Hawaii Community College had 155 students who graduated in Spring 1977: 3, liberal arts; 48, business; 13, health services; 4, hotel/food services; 3, public services; 84, technology.

a. Liberal Arts (32 continuing students; 65% continuation rate)

*There were no statistically significant differences in continuation rates, by student characteristics.*

b. Business (38 continuing students; 79% continuation rate)

Among the groups with the highest continuation rates in business were:

--graduates of Hawaii's Neighbor Island public high schools (85 percent)
--students with grade point averages of 2.0-2.9 (100 percent)
--students with credit-completion ratios of 1.00 (100 percent).

c. Technology (28 continuing students; 93% continuation rate)

The following groups had the highest continuation rates in technology:

--males (100 percent)
--students seeking A.S. degrees (100 percent)
--students with grade point averages of 2.0-2.9 (100 percent)
--students with credit-completion ratios of 1.00 (100 percent).

2. Honolulu Community College (420 continuing students; 66% continuation rate)

Data in Table B-2 cover four programs and unclassified students. The range in continuation rates was 76 percent for technology to 11 percent for unclassified students. Since the hotel/food services program and the unclassified group had fewer than 26 continuing students, discussion in this section will deal only with students in the liberal arts (114 continuing students), public services (81), and technology (215).

*There were statistically significant differences in continuation rates, by the following characteristics and for the following programs:*

| | |
|---|---|
| *--sex* | *technology* |
| *--full-/part-time* | *public service* |
| *--educational objective* | *technology* |
| *--grade point average* | *public services* |
| *--credit-completion ratio* | *public services, technology* |

Honolulu Community College had 110 students who graduated in Spring 1977: 11, liberal arts; 1, commercial baking; 19, public services; 79, technology.

a. Liberal Arts (114 continuing students; 56% continuation rate)

*There were no statistically significant differences in continuation rates by student characteristics.*

b. Public Services (81 continuing students; 70% continuation rate)

Among the students with the highest continuation rates were:

--full-time students (78 percent)
--students with grade point averages of 2.0-2.9 (87 percent)
--students with credit-completion ratios of .70-.79 (91 percent).

c. Technology (215 continuing students; 76% continuation rate)

Among the students with the highest continuation rates were:

--males (78 percent)
--students seeking A.S. degrees (78 percent)
--students with credit-completion ratios of .80-.89 (100 percent).

3. Kapiolani Community College (418 continuing students; 68% continuation rate)

Data in Table B-3 cover five programs and unclassified students. The range in continuation rates was 83 percent (five out of six students) for unclassified students to 48 percent for liberal arts students. Since three programs had low enrollments (health services, 18 continuing students; public services, 4 continuing students; unclassified students, 5), discussion in this section will deal only with students in liberal arts (101 continuing students), business (249) and hotel/food services (41).

*There were statistically significant differences in continuation rates, by the following characteristics and for the following programs:*

| | |
|---|---|
| *--age* | *business* |
| *--entry status* | *business* |
| *--full-/part-time* | *business* |
| *--educational objective* | *business* |
| *--grade point average* | *business* |
| *--credit-completion ratio* | *business, hotel/food services* |

Kapiolani Community College had 111 students who graduated in Spring 1977: 8, liberal arts; 39, business; 55, health services; 6, hotel/food services; and 3, public services.

a. Liberal Arts (101 continuing students; 48% continuation rate)

*There were no statistically significant differences in continuation rates, by student characteristics.*

b. Business (249 continuing students; 80% continuation rate)

Among the students with the highest continuation rates were:

--students below 19 years of age at entry (86 percent)
--new students (83 percent)
--full-time students (87 percent)
--students seeking A.S. degrees (84 percent)
--students with grade point averages of 3.0-3.4 and 2.0-2.9 (88 percent, each)
--students with credit-completion ratios of .70-.79 and .60-.69 (90 percent, each).

c. Hotel/Food Services (41 continuing students; 76% continuation rate)

Among the students with the highest continuation rates were those with credit-completion ratios of 1.00 (88 percent).

4. Kauai Community College (73 continuing students; 67% continuation rate)

Data in Table B-4 cover five programs and unclassified students. The range in continuation rates was 83 percent for unclassified students to 50 percent (1 out of 2) for health services students. All programs had low enrollments, i.e., fewer than 26 continuing students.

Kauai Community College had 46 students who graduated in Spring 1977: 12, liberal arts; 10, business; 2, health; 3, public services; 17, technology; and 2, unclassified.

5. Leeward Community College (639 continuing students; 69% continuation rate)

Data in Table B-5 cover five programs and unclassified students. The range in continuation rates was 77 percent for hotel/food services and public services to 40 percent for unclassified students. Since three programs had low enrollments (hotel/food services, 13 continuing students; public services, 13; unclassified group, 8), discussion in this section will deal only with students in liberal arts (452 continuing students), business (112) and technology (41).

*There were statistically significant differences in continuation rates, by the following characteristics and for the following programs:*

| | |
|---|---|
| *--age* | *liberal arts* |
| *--marital status* | *liberal arts* |
| *--grade point average* | *liberal arts* |
| *--credit-completion ratio* | *liberal arts, technology* |

Leeward Community College had 52 students who graduated in Spring 1977: 28, liberal arts; 11, business; 6, hotel/food services; 1, public services; 6, technology.

a. Liberal Arts (452 continuing students; 67% continuation rate)

Among the students with the highest continuation rates were:

--students over 29 years of age at entry (79 percent)
--married students (77 percent)
--students with grade point averages of 3.5 and above (73 percent)
--students with credit-completion ratios of .70-.79 (79 percent).

b. Business (112 continuing students; 76% continuation rate)

*There were no statistically significant differences in continuation rates, by student characteristics.*

c. Technology (41 continuing students; 76% continuation rate)

Among the students with the highest continuation rates were students with credit-completion ratios of 1.00 (100 percent).

6. Maui Community College (105 continuing students; 57% continuation rate)

Data in Table B-6 cover five programs and unclassified students. The range in continuation rates was 71 percent for technology to 29 percent (2 out of 7 students) for unclassified students. Since four programs had low enrollments (health services, 3; public services, 5; technology, 17; unclassified group, 2), discussion in this section will deal only with students in liberal arts (46 continuing students) and business (32).

*There were statistically significant differences in continuation rates, by the following characteristics and for the following programs:*

| | |
|---|---|
| *--marital status* | *liberal arts* |
| *--high school background* | *liberal arts* |
| *--full-/part-time* | *business* |
| *--grade point average* | *business* |
| *--credit-completion ratio* | *business* |

Maui Community College had 69 students who graduated in Spring 1977: 18, liberal arts; 26, business; 4, health; 20, technology; 1, unclassified.

a. Liberal Arts (46 continuing students; 55% continuation rate)

Among the students with the highest continuation rates were:

--married students (74 percent)
--graduates of U.S. Mainland and Possession high schools (67 percent).

b. Business (32 continuing students; 63% continuation rate)

Among the students with the highest continuation rates were:

--full-time students (75 percent)
--students with grade point averages of 2.0-2.9 (77 percent)
--students with credit-completion ratios of 1.00 (81 percent).

7. Windward Community College (77 continuing students; 65% continuation rate)

Data in Table B-7 cover two programs and unclassified students. The range in continuation rates was 90 percent (9 out of 10 students) for unclassified students to 33 percent (1 out of 3), business. Since two programs had low enrollments, (business, 1 continuing student; unclassified group, 9), discussion in this section will deal only with students in the liberal arts (67 continuing students; 63% continuation rate).

*There were statistically significant differences in continuation rates, by the following characteristics, for liberal arts students:*

*--sex*
*--grade point average*
*--credit-completion ratio.*

Among the students with the highest continuation rates in the liberal arts were:

--males (72 percent)
--students with grade point averages of 3.0-3.4 (80 percent)
--students with credit-completion ratios of 1.00 (84 percent).

Windward Community College had 11 liberal arts students and 1 unclassified student who graduated in Spring 1977.

## D. Summary and Conclusion

This section compares the major findings regarding continuing and non-continuing students for the past four semesters: Spring 1976, Fall 1976, Spring 1977 and Fall 1977. *Two important observations can be made:*

- *There are fewer statistically significant differences between continuing and non-continuing students in the third, fourth and fifth semesters than in the second semester of enrollment.*
- *The characteristic common to students with the highest continuation rates is credit-completion ratio.*

### 1. Significant Differences

a. For the community college total and for each of the seven community colleges, there were statistically significant differences in continuation rates for the following characteristics:

| Spring 1976 (2nd Sem.) | Fall 1976 (3rd Sem.) | Spring 1977 (4th Sem.) | Fall 1977 (5th Sem.) |
|---|---|---|---|
| Age | Grade point average | Grade point average | Credit-completion ratio |
| Entry status | Credit-completion ratio | Credit-completion ratio | |
| Full-/part-time | | | |
| Grade point average | | | |
| Credit-completion ratio | | | |

b. Another characteristic which showed statistically significant differences in continuation rates for the community college total and for six campuses in Fall 1977 was: grade point average.

c. Campuses differed significantly in their continuation rates for the second through the fourth semesters but not for the fifth semester.

### 2. Campus Differences, by Program

Enrollment in the various programs of the community colleges varies considerably. We set 26 continuing students as the minimum for analysis in this report of program differences.

a. No one program (enrolling at least 26 continuing students) in Fall 1977 had the highest continuation rate on all campuses: technology was highest at Hawaii, Honolulu and Leeward; business at Kapiolani, Leeward and Maui; liberal arts at Windward.[2] No program at Kauai enrolled 26 or more students. At Hawaii, Honolulu, Maui and Windward, the same programs also had the highest continuation rates in Spring 1977.

---

[2] In Spring 1977, for programs enrolling a minimum of 26 continuing students, business had the highest rates at Kauai and Maui; technology at Hawaii, Honolulu and Leeward; and liberal arts at Windward. (Student Flow Project, Report No. 23.)

b. Grade point average and credit-completion ratio continue to be significant in differentiating between continuing and non-continuing students in most programs enrolling at least 26 continuing students. (See Table 3.)

c. Programs on the various campuses differed greatly in the characteristics which showed statistically significant differences in continuation rates. For example, four campuses offered business programs which enrolled at least 26 continuing students: Hawaii, Kapiolani, Leeward and Maui. They differed in the nature and extent of "significant" characteristics. The range: at Kapiolani there were significant differences on six characteristics (age, entry status, full-/part-time status, educational objective, grade point average and credit-completion ratio); at Leeward, none.

3. Profile of Students with Highest Continuation Rates

Generally students with the following characteristics had the highest continuation rates in all semesters:

--students over 29 years of age at entry
--new students (rather than transfers)
--full-time students
--students with grade point averages of 2.0-2.9
--students with credit-completion ratios of .90-.99 and .70-.79.

4. Concluding Note

The data for the past five semesters show that students who enroll continuously without interruption have certain characteristics in common. The information offers a further basis upon which student counseling and academic advising programs can be more fully developed.

TABLE 3
STUDENT CHARACTERISTICS AND CONTINUATION/NON-CONTINUATION RATES,
BY CAMPUS AND PROGRAM
ENROLLING A MINIMUM OF 26 CONTINUING STUDENTS

*Kauai Community College not included since no program enrolled 26 or more students.

## APPENDIX NOTES

1. "Previous total" denotes continuing students at the end of the previous semester, excluding graduates.

2. Continuing Rate = $\frac{\text{number of continuing students}}{\text{previous total (excluding graduates)}}$

3. Levels of significance, based on chi-square analysis, are denoted thus:

   * .05 level  ** .01 level  *** .001 level

4. Continuation rates are not given if the previous total is under 10.

5. Continuation rates are not presented for students for whom no data are available on a particular characteristic.
